CP9180
USB Driver Installation Instructions

1. Plug the tool into an available USB Port, power the tool on, and put the tool in program mode (See user manual for program mode instructions)

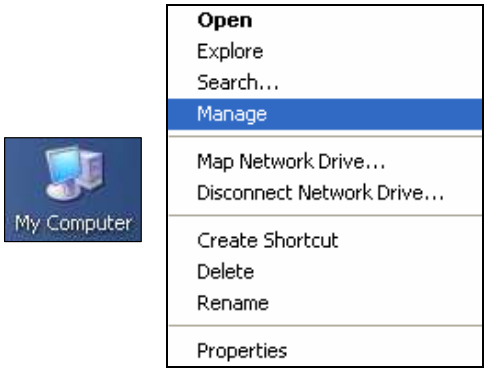
WINDOWS ME:

2. Open Windows "**Control Panel**" and *double-click* on the "**System**" icon

3. Click on "**Device Manager**" and proceed to step 4

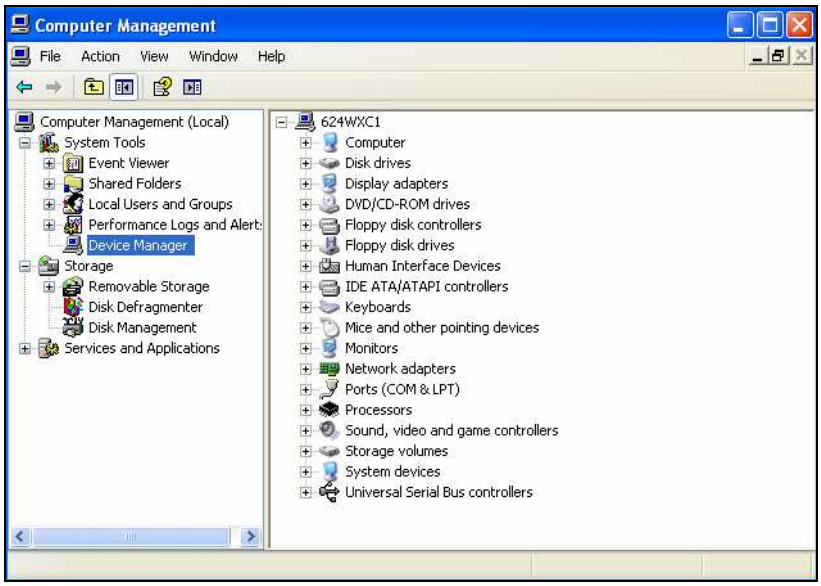
WINDOWS XP:

2. *Right-click* on your **My Computer** icon and select **Manage** from the drop down list



Downloaded from www.Manualslib.com manuals search engine

3. In the left-hand side of the Computer Management window, click **Device Manager**



4. In the right-hand column, *double-click* **USB Device**. This should be located under the **Other Devices** icon or the **Universal Serial Bus controllers** icon. Then, click **Reinstall Driver** or **Update Driver**.

**There is usually a yellow question mark or exclamation mark next to the icon and it is usually located under the “Other Devices” folder. If you have trouble locating the icon, reinsure that your tool is plugged in and powered on.

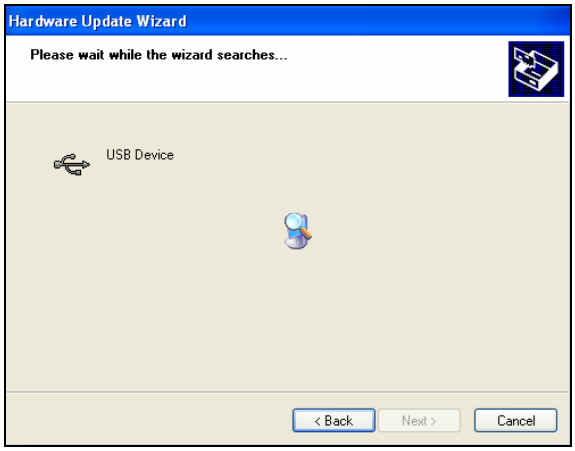
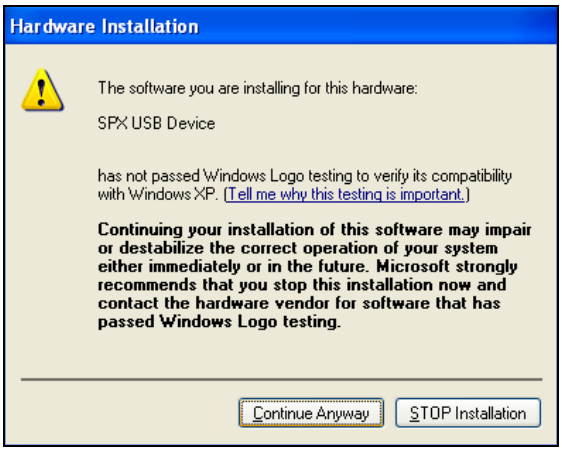
10. The Windows New Hardware Wizard will begin searching for the USB Cable Driver.

If a warning appears stating *the software you're installing has not passed windows logo testing* click **Continue Anyway.





Hardware Installation
The software you are installing for this hardware:
SPX USB Device
has not passed Windows Logo testing to verify its compatibility with Windows XP. (Tell me why this testing is important.)
Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft strongly recommends that you stop this installation now and contact the hardware vendor for software that has passed Windows Logo testing.
Continue Anyway
STOP Installation
